FINISHING TOUCH

 **UltraSpan**<sup>™</sup>  
PREMIUM SOFFIT

What the Best Homes are Wearing<sup>®</sup>

 **UltraSpan™** : Finishing Touch.  
PREMIUM SOFFIT

UltraSpan premium vinyl soffit by NAPCO complements a variety of exterior products, from vinyl and aluminum siding to brick and clapboard. Ideal for soffit, porch ceiling and vertical siding applications, it can be fastened with nails, screws or staples. And, because it's reinforced with Rigidmaster™ groove architecture, UltraSpan is stronger than lower-end vinyl soffits and more attractive than typical aluminum soffits.

What the Best Homes are Wearing®

**NEW Elusivent™ does double-duty.**

UltraSpan premium vinyl soffit features our Elusivent hidden ventilation system. Its unique angled vent design won't trap dirt like vented aluminum soffit, so UltraSpan will retain its fresh, new appearance for years. It performs as beautifully as it looks, helping create positive airflow in the attic and around the rafters—so the home stays cooler in summer and drier in winter, and more comfortable year round.

**Outperforms aluminum without breaking the budget.**

Aluminum soffit can dent, scratch and trap dirt. Lower-end vinyl soffits can cup, sag and bow. But affordable UltraSpan premium vinyl soffit stays straight, strong and virtually dent-free. It's backed by a Lifetime Limited Transferrable Warranty from NAPCO, a leading manufacturer of high quality vinyl siding and exterior design products for 40 years.

**ALUMINUM SOFFIT  
WITH PERFORATED VENTILATION**

**ULTRASpan PREMIUM SOFFIT  
WITH ELUSIVENT VENTILATION**

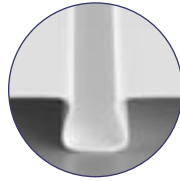

**Choose UltraSpan: more attractive,  
looks like new for years.**

# STRENGTH

## Superior performance begins with Rigidmaster.

UltraSpan™ premium vinyl soffit by NAPCO® is engineered to be the best in its class. NAPCO started with Rigidmaster, an innovative groove architecture that helps ensure that panels lay flat. Then added an impressive .046" panel thickness and a strong, curled nail hem that provides a two-layer attachment point. Together with Rigidmaster, these features help panels resist sagging, cupping and bowing\* while helping seal out the elements—even in high-velocity winds. Finally, NAPCO added an enhanced locking system that keeps panels joined together for even greater rigidity.

### RIGIDMASTER™

ULTRASPAN PREMIUM SOFFIT

LOWER-END VINYL SOFFIT

Rigidmaster helps UltraSpan panels go the distance.

## WHY

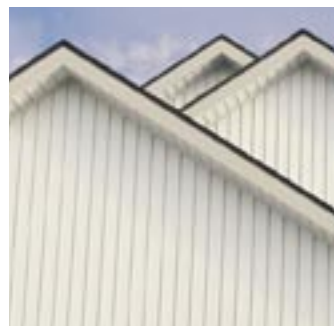

- Exclusive Rigidmaster groove architecture helps ensure that panels lay flat and resist sagging\*
- Elusivent™ hidden ventilation system won't trap dirt—retains its attractive appearance for years
- .046" thick panels are sturdy and dent-resistant
- 1/2" panel projection for maximum rigidity and straighter application
- Available in D5" solid or Elusivent hidden vent profiles
- Ideal for spanning porches or vertical application
- Lifetime Limited Transferable Warranty

## 14 colors designed to delight.

UltraSpan premium vinyl soffit is available in a variety of colors with a low-gloss, pebble finish and excellent color retention. From traditional to decorator favorites, you'll find a color to suit any taste.
